

B2B platform that enables companies to create, customize, and manage generative AI agents without writing a single line of code.

Context

AI holds immense potential, but most companies lack the technical knowledge, resources, or infrastructure to implement it effectively. This creates a gap between the desire to automate and the real capacity to do so.

Product

Nubiq offers a visual platform to create IA agents from prebuilt templates. Users can configure agents that:

- Understand natural language.
- Automate personalized workflows.
- Learn and adapt over time.
- Integrate with tools like WhatsApp, CRMs, or spreadsheets.

Real value for SMEs

Nubiq helps SMEs save time and cut costs by automating repetitive work. Examples include:

- A FAQ chatbot that responds to clients instantly.
- An agent that tracks supplier prices and recommends the best deals.

Why now?

- The generative AI market is growing rapidly.
- No-code tools are increasingly being adopted.
- SMEs need immediate and user-friendly solutions.

Market

- 12.5M companies in LATAM.
→ USD 4.3–7.3B.
- 500k companies in Argentina
→ USD 200–295M
- 100k SMEs in Argentina
→ USD 35–59M (3 years)

*Do not adapt your business to AI.
With Nubiq, adapt AI to your
business.*

Our landing page

Competitors

Zapier, Make, n8n and Darwin AI automate tasks, but require technical skills or offer limited logic. Nubiq stands out by combining true AI capabilities with a no-code visual interface.
